DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see page 3, filed 08/14/2006, with respect to claims 1 – 15 have been fully considered and are persuasive. The rejection of claims 1 – 15 has been withdrawn.

Drawings

The drawings are objected to because the unlabeled rectangular box(es) shown in the drawings should be labeled with descriptive text (37 C.F.R. 1.83(a); MPEP 6.08.02(b)). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claim 9 is rejected under 35 U.S.C. 101 because the preamble states a software program but the body of the claim is a method not showing for example a computer readable medium; software/computer program do not define any structure and functional interrelationships between the computer program and other claimed elements of a computer which permit the computer program's functionality to be realized therefore, they are non-statutory. See Diehr, 450 U.S. at 191, 209 USPQ at 10 and Benson, 409 U.S. at 71-72, 175 USPQ at 676.

Allowable Subject Matter

3. Claims 1 – 8, 10 – 15 are allowed. The following is an examiner's statement of reasons for allowance:

A comprehensive search of prior art of record failed to teach, either alone or in combination, a method/apparatus for correcting a measured signal transmitted through a system comprising of reproducing a sampled measured signal sequence to yield a plurality of copies of said sampled measured signal sequences; appending said plurality of copies to one another to yield a signal series; windowing said signal series with a window function to yield a windowed signal series; and recalculating a corrected measured signal from said windowed signal series using information about a frequency-dependency of said system as recited in independent claims 1, 7, 8, 10, 11 and in combination with other elements of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
